TUBLAIT 2007/19/CE 143018 203 21

(EU) N° 10/2011

✓ fruit juices
✓ wines

✓ alcohols
✓ milk

APPLICATIONS

- Milk circulation
- Suction

SECTORS OF ACTIVITY

- Dairy operations : processing room equipment and milking equipment
- Laboratories

Un-reinforced food-grade flexible tube.

Monolayer design in food-grade PVC, blue tint. Smooth inner and outer surfaces.

Marking : TUBLAIT (EU) N° 10/2011 [batch number]

ADVANTAGES

Tublait hose has been specially designed for milk circulation. Suitable for contact with foodstuffs and excellent mechanical resistance to pulsing. Tublait is the hose for dairies and milk processing industries. Even in cold weather, Tublait maintains its excellent flexibility. It is easy to bend and transparent, allowing liquid flow to be observed.

It is easily cleaned with hot water up to 80°C peaks. Its excellent vacuum resistance allows use as a vacuum tube in a laboratories.

CONNECTORS

Usual connections in processing rooms.

Barbed connectors with band, worm drive, screw or 'O' type clamps.

Crimping unsuitable.

Easily assembled on a smooth tube with clamps.

CHEMICAL RESISTANCE

See table pages 69 to 72 column A.
